

The CT-Assist_Module 6.0

Add-On for the SAP® ABAP™ Workbench

Double click /forward navigation

Double click /forward navigation

The double click / forward navigation is an important feature when working with ABAP™ source code.

More than 34 double click / forward navigation functions are implemented in the CT-Assist_Module.

The following table contains examples on this feature. We are assuming that you double click or press F2 on the green marked source code words. Depending whether this object exists or not, the action in column 2 is carried out (e.g. clicking on **SY-SUBRC** will jump to the Data Dictionary).

| ABAP™ command (the double clicked word is marked green) | Action |
|---|--|
| MOVE SY-SUBRC TO Z_SUBRC or TYPES: Z_DATA LIKE T100 . | Goto data dictionary. |
| MOVE SY-SUBRC TO Z_SUBRC . | Goto declaration (local or global). |
| PERFORM SUBROUTINE1 USING Z_TYPE_T100. | Goto FORM. |
| PERFORM SUBROUTINE2 USING Z_TYPE_T100. | Create new FORM. |
| FORM SUBROUTINE1 USING P_Z_TYPE_T100. | Where-used in complete main program. |
| CALL FUNCTION ' RSAQSFN_SELECT_FIELD_NAMES ' | Goto function module. |
| CALL FUNCTION ' Y_NEW_FUNCTION ' | Create new function module. |
| REPORT YCT_DOPPELKLICK_TEST MESSAGE-ID DS . | Goto message class maintenance. |
| REPORT YCT_DOPPELKLICK_TEST MESSAGE-ID YNACH02 . | Create message class. |
| MOVE TEXT-001 TO Z_BUF. | Goto text element. |
| MOVE TEXT-002 TO Z_BUF. | Create new text element. |
| MESSAGE ID ' ME ' TYPE 'E' NUMBER '003'. | Goto message class. |
| MESSAGE ID ' YTEST2 ' TYPE 'E' NUMBER '001'. | Create new message class . |
| MESSAGE ID 'ME' TYPE 'E' NUMBER ' 003 '. | Goto to the message number this one (read implicit) message class. |
| MESSAGE ID 'YTEST2' TYPE 'E' NUMBER ' 001 '. | Create new message. |
| INCLUDE YDATEN . | Include is loaded into CT-Assist_Module. |

| | |
|--|--|
| INCLUDE YDATENNEU . | Create new include. |
| CALL SCREEN 100 . | Goto dynpro. |
| CALL SCREEN 120 . | Create new dynpro. |
| CALL METHOD STARTUP_MANAGER->START . | Goto declaration of class instance in source code. [Data: STARTUP_MANAGER type REF TO CL_WB_STARTUP.] |
| DATA: STARTUP_MANAGER TYPE REF TO CL_WB_STARTUP. | Where-used global data field. |
| DATA: STARTUP_MANAGER TYPE REF TO CL_WB_STARTUP . | Goto class definition dialog (SE24). |
| CL_WB_STARTUP=> START or STARTUP_MANAGER-> START . | Goto class method (SE24). |
| CALL TRANSACTION ' SE38 '. | Goto transaction administration. |
| CALL TRANSACTION ' SE38A '. | Create new transaction. |
| SET PF-STATUS ' YSTAT1 '. | Goto GUI status. |
| SET PF-STATUS ' YSTAT2 '. | Create new GUI status. |
| SET TITLEBAR ' ABC '. | Goto CUA title. |
| SET TITLEBAR ' ABC2 '. | Create new CUA title. |
| AUTHORITY-CHECK OBJECT ' A_IMA_BUK '. | Goto transaction "Display Authorization Object". |
| AUTHORITY-CHECK OBJECT ' Y_IMA_BUK '. | Create new authorization object. |
| REPORT YCT_DOPPELKLICK_TEST . | Where-used report. |
| MOVE SY-SUBRC TO ZXYZ_SUBRC . | Create new global field. |
